

Panel with various electrical components and labels:

- Labels: "CHARGE RESISTIVE", "Plan de charge 2 kw", "M/A GENERAL", "MONO et CONTINU 220 V".
- Components: Two power outlets, six rotary switches (5%, 10%, 15%, 20%, 25%, 25%), three indicator lights, a red emergency stop button, and two analog meters.

Wiring setup on a grey surface:

- Power Source:** A black power cord with a white plug is connected to a white terminal block labeled "230V".
- Switching and Protection:** A red wire runs from the terminal block through a circuit breaker (labeled 1, 2, 4) and a double-throw switch.
- Measurement:** A digital multimeter is connected in series with the load.
- Load:** A light bulb is connected to the output of the circuit.
